

A Lullaby for the Dragons

"Once upon a time, in the far, far away galaxy Incipit, there was a tiny planet. Amon was its name."

WELCOME TO AMON

There lived Otis, a teenager with blue eyes and white hair. But he was no ordinary boy. He had magic powers.

One day, he was walking in the forest when, suddenly, he saw a gorgeous girl. She had green eyes, wavy black hair and her skin was ivory white. When Otis approached her, she started to scream "

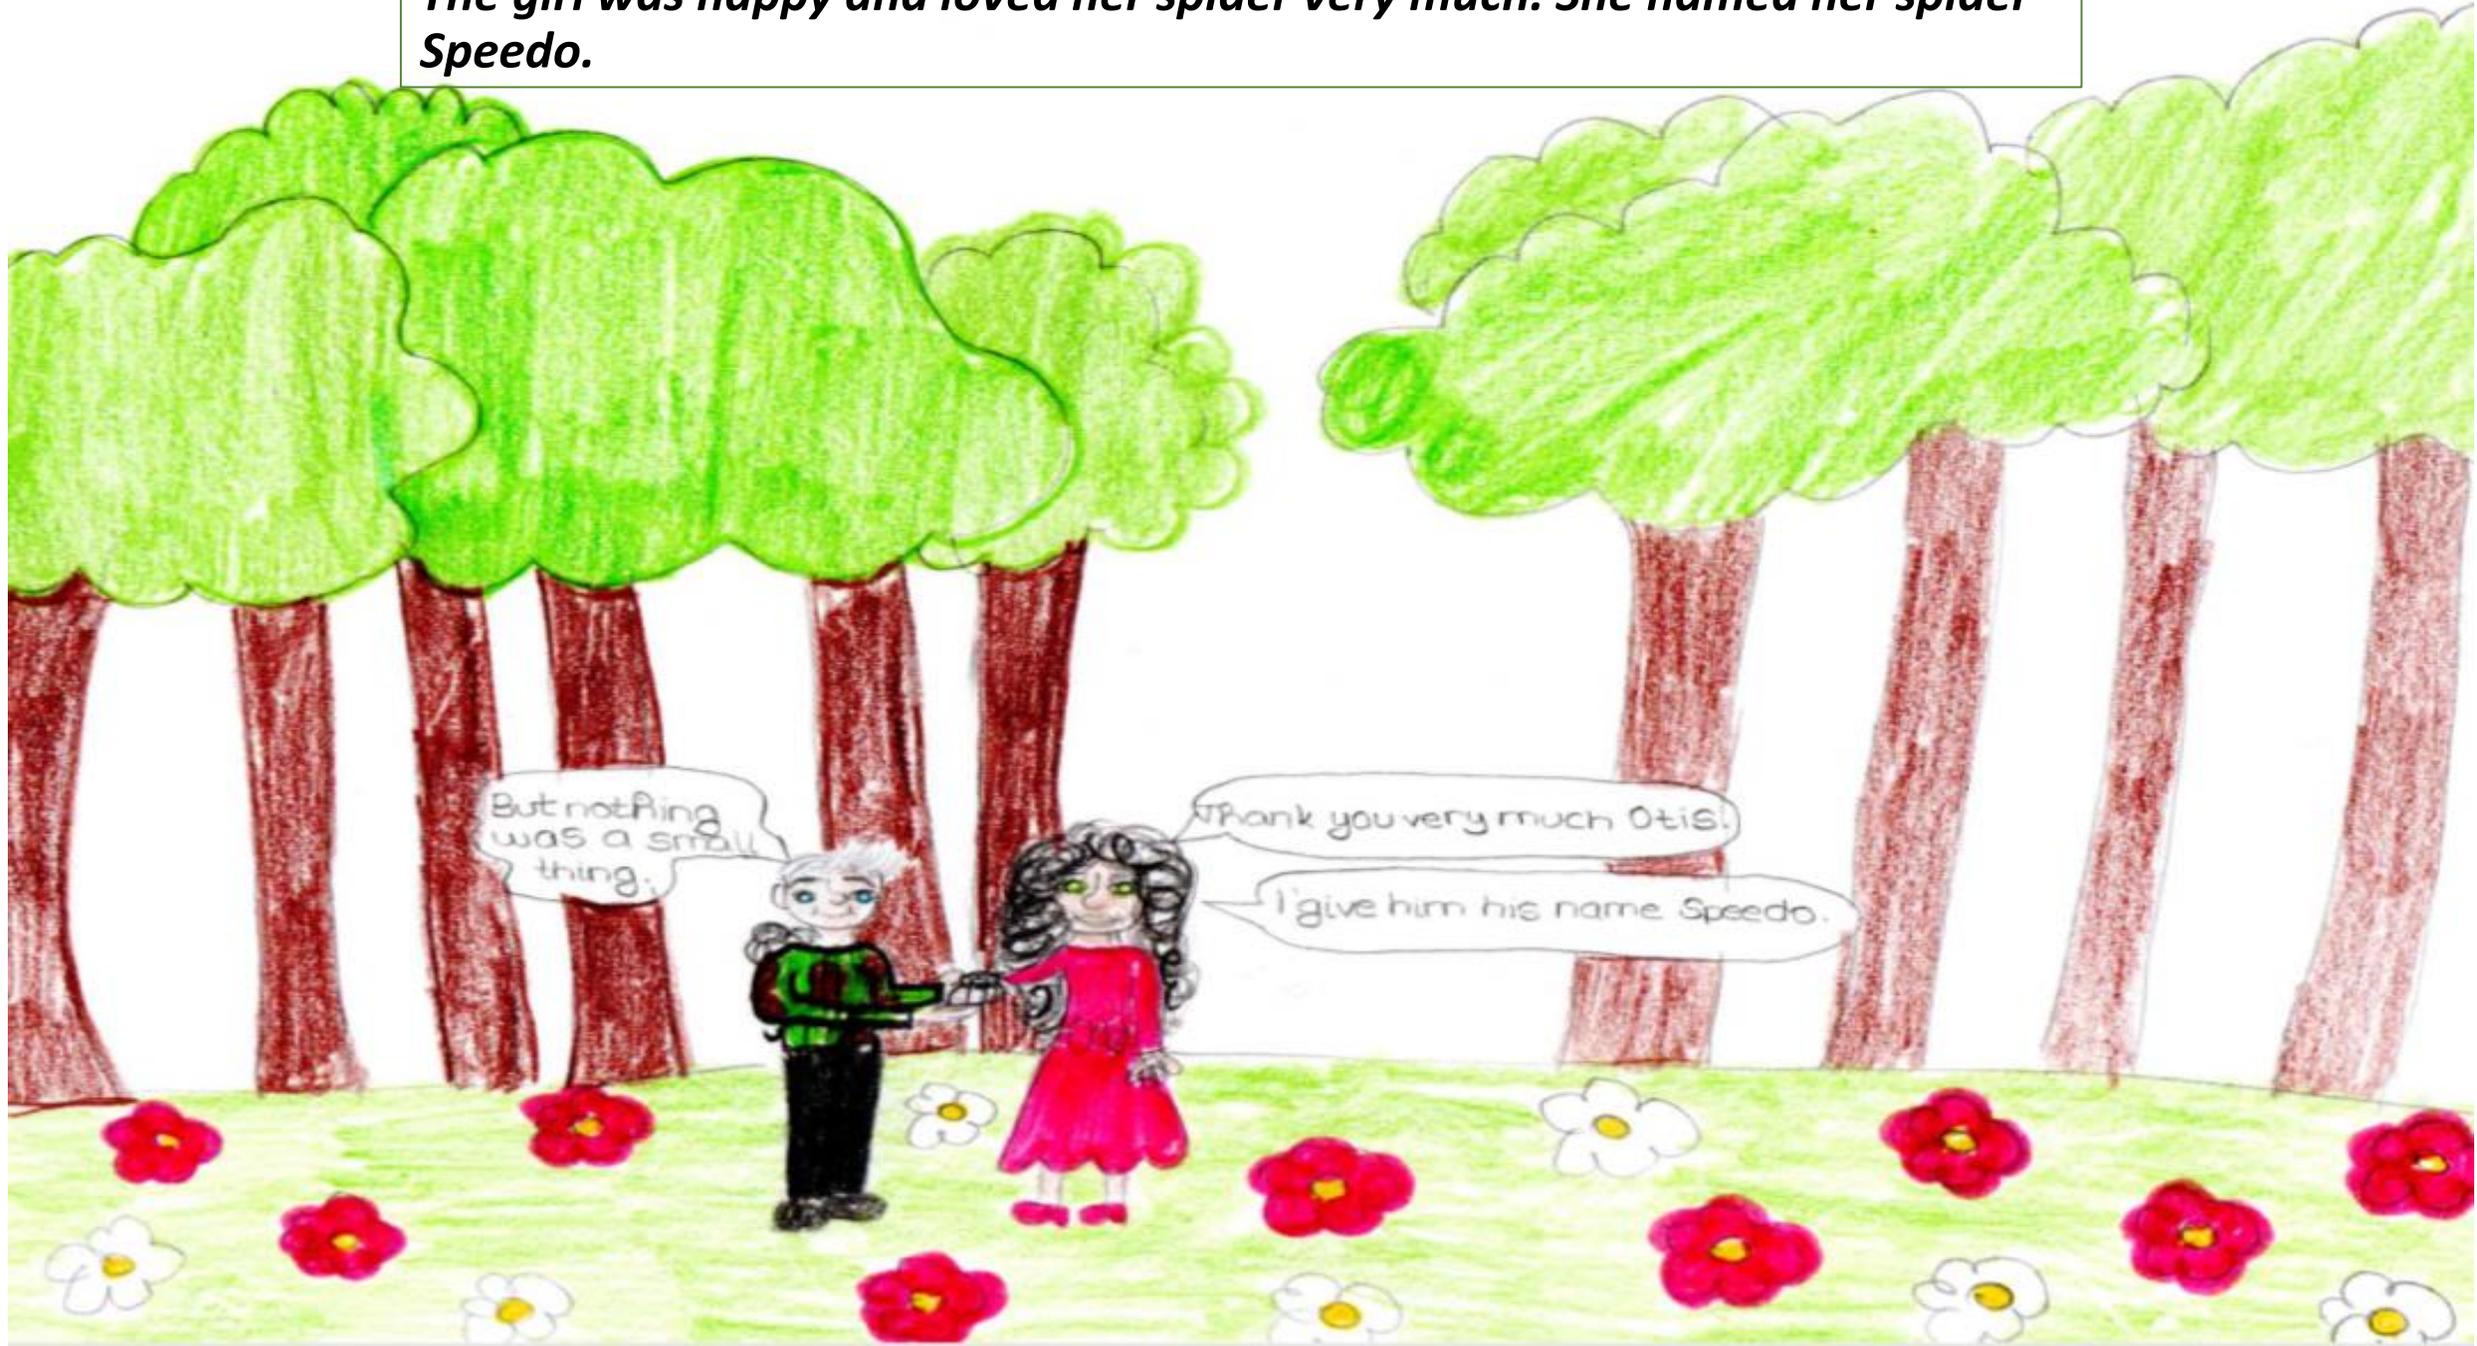

There was a spider on his head, but he did not know it. She screamed, "Spider!"

He was not afraid of spiders and this one was his pet, Speedy. He introduced it to her and she was not afraid anymore. She wished for a pet like that. Otis used his magic and created a twin spider to be her pet.

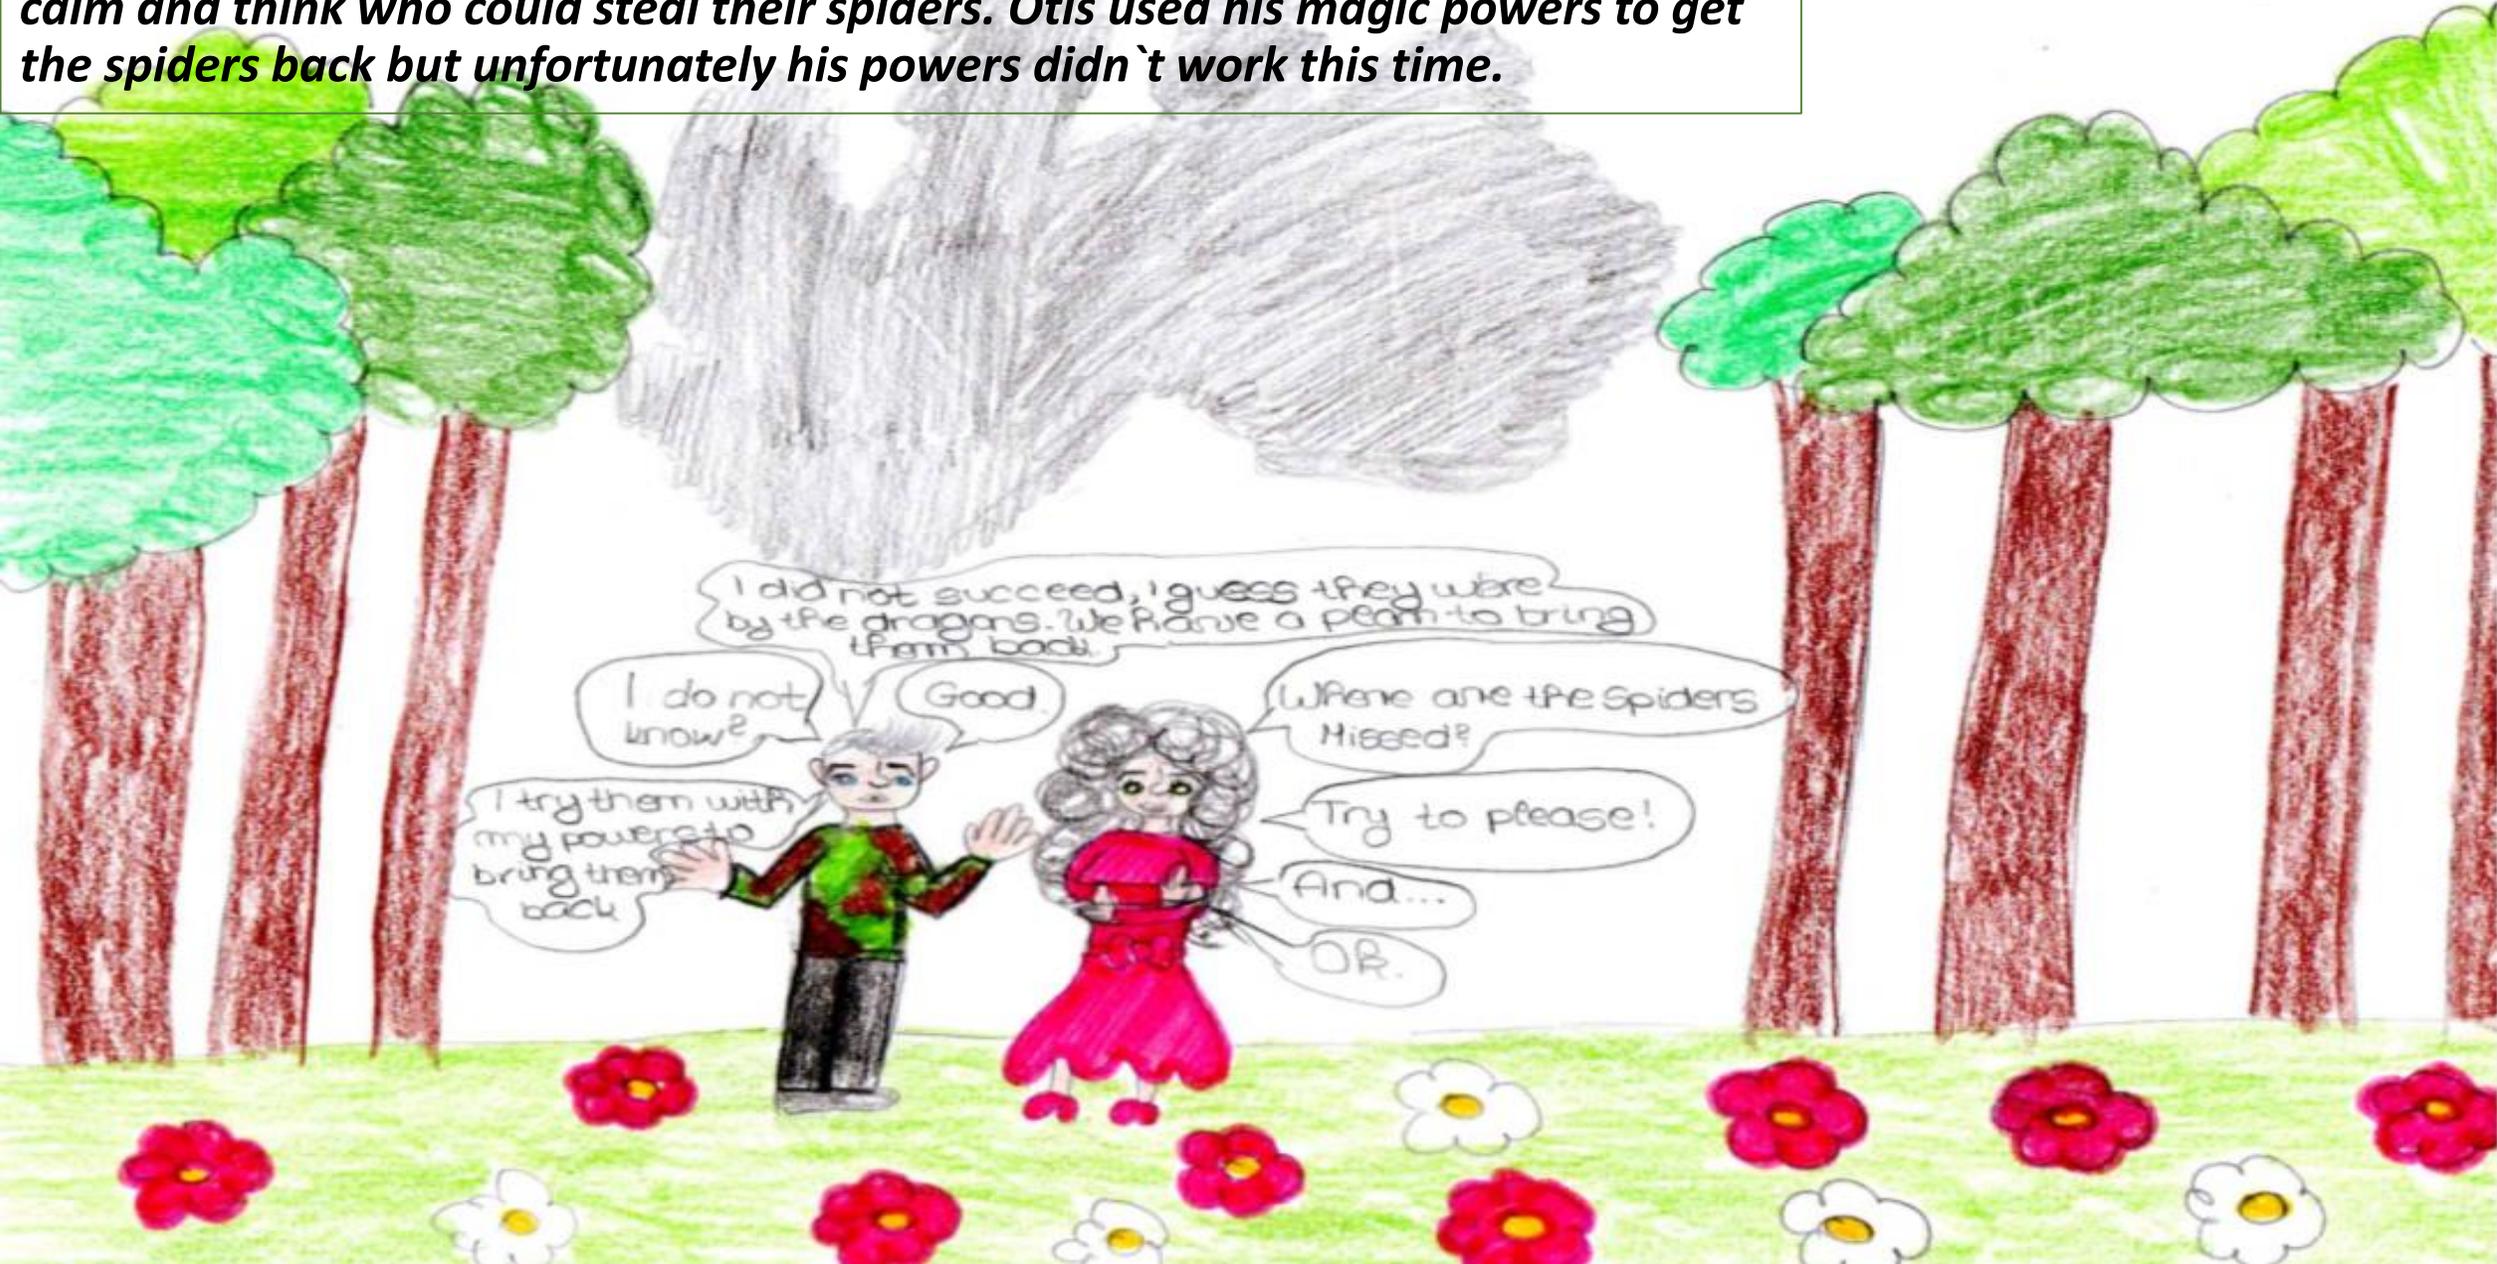

The girl was happy and loved her spider very much. She named her spider Speedo.

Otis, the girl and the spiders became very good friends and did everything together. They walked in the woods, played games and had a wonderful time.

Then, one day, something horrible happened. Their pet spiders were stolen. They looked for the spiders everywhere but couldn't find them. They tried to be calm and think who could steal their spiders. Otis used his magic powers to get the spiders back but unfortunately his powers didn't work this time.

I did not succeed, I guess they were by the dragons. We have a plan to bring them back.

I do not know.

Good.

Where are the spiders missed?

I try them with my powers to bring them back.

Try to please!

And...

OR.

He was sure that the spiders were stolen by the dragons. The dragons were the only ones who had stronger powers than Otis. The boy and the girl started to create a plan to save the pets who were very dear to them.

They decided to go to the dragons, but they didn't know how they would get up there, the problem was that the dragons lived on the top of a volcano with blue lava. But how would they get up there? They searched and found a magic rope of tape, it was steel light, and would help them reach up to the very top of the volcano. Otis thought for himself "Maybe if the tape can help is reach the dragons, it can also help us fight the dragons?"

They created a plan. They took the magic rope which turned into a long ladder and they used it to climb up the volcano. When they got there, they saw sleeping dragons and a cage full of spiders. Otis and the girl used the magic tape and tied the dragons. When the creatures woke up, they were really scared.

They told that they couldn't sleep and the song of the spiders helped them. That's why they had stolen them. Otis told the dragons: "You must go with us to the forest where we live. In the forest there are a lot of spiders which love singing and do it every night." The dragons agreed and moved to the forest.

And now the forest was calm and peaceful again. Otis and the girl lived happily ever after with their spiders and their new friends – the dragons. The dragons were happy, too. They made new friends and now they could fall asleep easily listening to the spiders singing a lullaby every night.
